Hi-So provides matching services for logistics companies and food delivery / online shopping services in Myanmar.

Currently, against the backdrop of the corochronic traffic congestion in urban areas and concerns about the new coronavirus, the demand for delivery is rapidly increasing in Myanmar, and due to the need to support sales at restaurants, we decided to share our know-how and support related to restaurants and delivery.

With this business alliance, yathar has implemented deep link type buttons at stores where delivery can be used, enabling seamless ordering of deliveries via Hi-So.
